LIGHTING PRODUCTS 2012

Mag Instrument is proud to be a leader in the current renaissance in American manufacturing. Mr. Maglica himself, a fervent believer in the importance of manufacturing in the United States, insists that the manufacture of Mag Instrument's flashlights remain U.S.-based. He has dedicated himself to proving that American products can excel in the global marketplace by using technology to continuously improve quality and reduce costs. Over the last three decades, Mr. Maglica's innovations have enabled Mag Instrument to offer consumers a consistently better value than the competition.

Strengthen American Manufacturing

Mag Instrument is the only flashlight company with significant market share that still manufactures its entire line of flashlights in the United States. Unlike its competitors, Mag Instrument has chosen not to outsource the manufacturing of its flashlights to foreign countries in order to take advantage of cheap labor and less stringent environmental standards, which may also result in inferior quality. The outsourcing of manufacturing by other U.S. companies has caused millions of jobs in the United States to be lost. Indeed, if Mag Instrument had chosen the path of other flashlight companies, the jobs of hundreds of its employees in Ontario, California, would have been lost - with corresponding job losses, no doubt, at other U.S. companies that supply parts, materials and services to Mag Instrument.

LED FLASHLIGHTS

The ANSI/NEMA FL 1-2009 Flashlight Basic Performance Standard was developed by a committee of several flashlight manufacturers and was approved on August 18, 2009. MAG has designed and engineered its products with **Precision Focused Optics** and **Intelligent Electronics** to optimize the targeted delivery of useful light over an extended period of time, instead of settling for mere light output. This is reflected in its products' superior peak beam intensity, beam distance and run time.

MINI MAGLITE® PRO™
LED FLASHLIGHT

Introducing the all new MINI MAGLITE® PRO™ LED Flashlight. - The iconic look of our original Mini Maglite® 2AA flashlight, introduced more than a quarter-century ago, is still seen in this newest member of the family. So is that same classic simplicity of function: Just twist the head to turn on, turn off and focus the beam – That's it. But there's one big difference: The new Mini Maglite® PRO™ houses a latest-generation LED – a light engine that yields a level of performance that, back in the day, just wasn't possible in a flashlight this size.

- **CLASSIC SIMPLICITY –** Twist the head to turn on, turn off, and focus.

- **MODERN POWER –** Next-generation LED for a whole new level of brightness.

Accessories:

Black Nylon Full Flap Holster (AP2X136)

MINI MAGLITE® PRO+™
LED FLASHLIGHT

Introducing the all new MINI MAGLITE® PRO+™ LED Flashlight. - Features the same iconic beauty that has made Mini Maglite® the world's most recognizable lighting instrument for a quarter-century. And it has the same renowned, high-precision optics that the MAGLITE brand has always stood for. But there's a "PLUS" (two, actually): (1) The PRO+™ offers new, powerful electronics, driving the state-of-the-art LED light engine to an impressive lumen output at the "high" setting and (2) The PRO+ ™ lets the user choose between two power levels – one for maximum brightness the other to conserve power.

- **CLASSIC SPOT–TO-FLOOD FOCUS -** Just twist the head (same as always)

- **PLUS TWO-LEVEL POWER –** Unique switching system lets you select "high" for dazzling brightness or "low" to save batteries.
