ABOUT MAGLITE®

Mag Instrument is dedicated to the highest standards of quality and integrity. Each Mag Instrument flashlight represents a culmination of more than 20 years of research, development and continuous state-of-the-art refinement in every precision feature.

We believe the spirit and character of the company is most clearly defined and expressed by the founder, owner and president Anthony Maglica. Each flashlight is a result of his obsession with fine engineering, craftsmanship and his commitment to perfection.

Today Maglite® is at the forefront of design and innovation.

MAGLITE® LED TECHNOLOGY

MAG-LED™ Technology is the result of a quest to produce a light source that would not only incorporate longer battery life and superior performance, but would also have the same durability, reliability and superior performance Maglite® flashlights are known for.

Today's MAG-LED™ range incorporates ground-breaking technology and user led design to offer the customer a torch suited to a range of activities whether you are embarking on an expedition, camping with the family or using a torch in a professional capacity.

MAG-LED™ Benefits:

• Selectable modes and motion control beam adjustment

• A Projecting Beam that focuses simply by rotating the head

• Balanced Optics™ provide a focusing LED, optimised to produce a powerful beam

• Intelligent Energy Source Management (patent pending) balancing an optimum high brightness with extended battery life

PLUS: All of the quality features professionals and consumers expect from a Maglite® flashlight:

• Rugged, machined aluminium construction with knurled design

• Anodised inside and out for improved corrosion resistance

• Water and shock resistant

• Limited Lifetime Warranty

ANSI Icon Reference:

Light Output
Light Output is the total luminous flux. It is the total quantity of emitted overall light energy as measured by an integrating the entire angular output of the portable light source. Light output in this standard is expressed in units of lumens.

Beam Distance
Beam distance is defined as the distance from the device at which the light beam is 0.25 lux (0.25 lux is approximately the equivalent of the light emitted from the full moon "on a clear night in an open field").

Run Time
Run Time is defined as the duration of time from the initial light output value – defined as 30 seconds after the point the device is first turned on – using fresh batteries, until the light output reaches 10% of the initial value.

Peak Beam Intensity
Peak beam intensity is the maximum luminous intensity typically along the central axis of a cone of light. The value is reported in candela and does not change with distance.

Water Resistant
Water splashed against the device from any direction shall have no harmful effects. An apparatus is used to spray water from all directions at specified water pressure, direction, and duration as described in ANSI/IEC 60529, Section 14.2.4 for IPX4 evaluation. All test samples shall function normally immediately after the test and 30 min after the test.

Impact Resistance
Impact resistance is the degree to which a device resists damage from dropping on a solid surface. Products are dropped with all intended additions: batteries, elastic, tethers, hand straps, etc. Each sample is dropped 6 times using impact orientations that approximate a cube.

*All Maglite® flashlights are tested by an independent laboratory

The Mini Maglite® LED is crafted after the legendary Mini Maglite® flashlight, an icon of classic American design, famous around the world. Built tough enough to last a lifetime.

The Mini Maglite® LED 2-Cell AA torch features a multi-mode electronic switch, providing the following settings with a simple twist of the head:

- SOS
- Blink
- 100% Power
- 25% Power

MULTI-MODE ELECTRONIC SWITCH 4 MODES

The Benefits Include:

- A Projecting Beam that focuses simply by rotating the head
- Balanced Optics™ provide a focusing 3 Watt LED, optimised to produce a powerful beam
- Intelligent Energy Source Management (patent pending) balancing an optimum high brightness with extended battery life
- Candle Mode – unscrew flashlight head, place head down on stable flat surface and set flashlight barrel into head

2 AA Holster Blister Pack Includes: Mini Maglite® LED 2-Cell AA Flashlight, black polypropylene belt holster & two AA Cell Duracell alkaline batteries.

2 AA Presentation Box Includes: Mini Maglite® LED 2-Cell AA Flashlight, black presentation box & two AA Cell Duracell alkaline batteries.

The Maglite® flashlight, renowned for its quality, durability, and reliability, is now available with the new MAG-LED™ Technology.

Designed for professional and consumer use, Maglite® LED flashlights build on the experience in craftsmanship, engineering, and advanced technology evident in all Mag® flashlights. The Maglite® flashlight is internationally accepted as the Professional Flashlight.® Built tough enough to last a lifetime, its durability and patented features now combined with the new MAG-LED™ Technology make the Maglite® LED flashlight a technologically advanced lighting instrument.
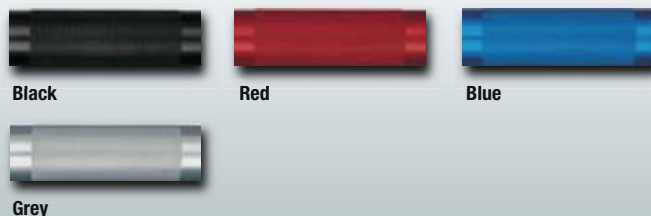

Available In 2 & 3 Cell D Size, The Benefits Include:

• A Powerful Projecting Beam that focuses simply by rotating the head

• Balanced Optics,™ combining a highly refined reflector with a quality LED, for a brilliant adjustable beam

• Intelligent Energy Source Management balancing high brightness with extended battery life

MAGLITE INCANDESCENT

The introduction of the first Maglite® flashlight in 1979 set a new standard for quality, durability and design in the torch industry. Today these original design features still work and have been continually improved to provide customers with a product that offers the following benefits:

- Precision machined high strength aircraft aluminium alloy cases

- High intensity light beam

- Linear focusing spot to flood beam with the twist of a wrist

- Spare Krypton bulb safely secured in the tail cap

- Maximum corrosion resistance and durability

- Plated contacts with the finest metals to enhance conductivity, reduce oxidation and increase durability

- Manufactured in the USA and protected by a lifetime guarantee

- High grade rubber 'O' rings ensure that a Maglite® is water and shock resistant
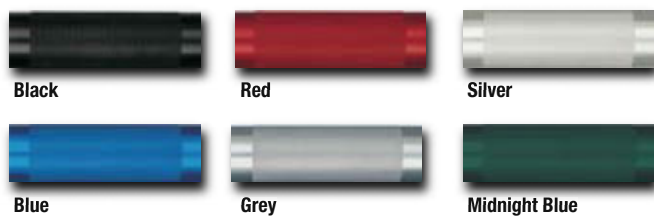

SOLITAIRE®

97cd

20m

2 LUMENS

1m

3h 45m

Less than an ounce and three inches in length, the Solitaire® offers the same precision engineering found in every Maglite®. Using only a single AAA battery, its focusing beam is surprisingly bright for such a small flashlight. A spare Solitaire® bulb is included in the tail cap along with an Energizer® alkaline battery and a sturdy key lead which facilitates the use of the key and light beam in the same direction. Ideal for the handbag or suitcase.

MINI MAGLITE® AAA

All the features that make the Mini Maglite® AAA flashlight a marvel of engineering can be found in our Mini Maglite® AAA version as well. Equally impressive is the fact that the Mini Maglite® AAA has a beam equal to that of many larger flashlights. (This is due in part to its superior optics and custom reflector.) The Mini Maglite® AAA comes with its own Energizer® alkaline batteries and a removable clip. It fits easily into a pocket or small purse.

From the earliest beginnings of the company, Maglite® have designed products for those who demand more from a flashlight than just a simple source of light. Because Maglite® understand a flashlight is more than simply the sum of its parts. It is a complex working relationship between lamp, reflector, and power source.

Only Maglite® offers a truly balanced and efficient lighting system. What's more, a Maglite® is designed tough enough to last a lifetime. Which is precisely why more police, security, emergency, medical and fire professionals around the world have come to rely on Maglite® C and D-Cell flashlights.

All C-Cell Flashlights are supplied in blister packs with D-Cell flashlights available in blister packs or boxed.

MAGCHARGER® V3

The ultimate lighting tool! This masterpiece of engineering can be mounted into a 360 degree charging ring so the MagCharger® can be recharged easily in any position.

The MagCharger® flashlight combines famous Maglite design, reliability and beam-adjustability with a powerful Halogen lamp.

The Benefits Inlcude:

- State of the art optical reflector - A high-tech metallic reflector, combined with a tempered glass lens that delivers superior optical performance

- Durable Sleek black finish, hard-anodizing inside and out for improved durability

- O-ring sealed throughout for resistance to weather and harsh environmental conditions

- Fit and Finish Precision machined high-strength aluminium alloy case – Individually serial numbered for identification

- NiMH Rechargeable Battery – Environmentally friendly

- Easily replaced high intensity halogen lamp

- Aluminium contact rings allow charging in any position

Includes: MagCharger® Flashlight, Charging Cradle, NiMH Rechargeable Battery Pack, (2) Mounting Brackets, 120 Volt Converter, Mobile Power Adapter (12 Volt) and a backup Halogen lamp stored in the tail cap.
