

# US-52

US-52 AC Motor Speed Controller / Regulator

## Model and implication

**U/S   S   52**

11: Single phase 110VAC 50Hz  
52: Single Phase 220VAC 50Hz  
33: Digital Display  
Speed Governor Function

U:Combination type  
S:Saparation type

## Technical Parameters

Description:

Motor Speed Control use in motor and electric device.

Adjust the rate of stability and mechanical properties.

Corotation/ Reverse Option, connect CW and COM is corotation, Connect CW and CCW is option.

Green LED indicator, on/ off switch for controlling, the knob switch for adjust the speed.

US-52 220V 50Hz Electrical AC Motor Speed Control Pack

Motor Speed Control Pack is widely used in packaging, brushing, food, electronics, the medical instrument, glasses machinery industry to the production stage machinery velocity modulation driver.

## Specifications:

Product Name	Motor Speed Control
Power	220V 50HZ
Material	Plastic, Electrical Material
Color	Black
Governor Deflection	90-1400r/min
Control Way	Corotation/ Reverse Option
Fixed Way	Screw Fixed
Outline Size	65*155*162mm(L*W*H)
Cable Length	68cm
Weight	215g
Package Content	1 x Motor Speed Control
